## CAREER OBJECTIVE

I am a full-stack developer skilled in JavaScript, React, Node.js, Firebase, Express.js, and MongoDB (MERN stack). I am passionate about solving technical challenges and eager to work on real-world projects and APIs. I seek a platform where I can grow my skills and contribute significantly to a team.

## TECHNICAL & SOFT SKILLS

**Front-end:** JavaScript, ES6, React.js, Firebase, Tailwind CSS, HTML5, CSS3, Axios.

**Backend:** Node.js, Next.js, MongoDB, Express.js, Mongoose, JWT.

**Tools:** Git & GitHub, npm, VS Code, Netlify, Vercel, Firebase.

**Soft Skills:** Problem-Solving, Quick Learner, Time Management, Critical Thinking, Communication, Teamwork & Collaboration.

## PROJECTS

**Shapora** (October 2025 - October 2025)

[Live](#) | [Client](#)

Shapora is a user-friendly, fast, and simple online shopping app with smooth navigation, where you can easily shop and manage items with timely delivery. I faced challenges with errors, FirebaseAuth, and Vercel deployment, which I resolved through research, learning problem-solving, and debugging along the way.

- **User-Friendly Interface:** Users can easily browse products, view details, select, and purchase items with minimal effort, navigating seamlessly across all pages.
- **Filtering & Features:** Users can easily filter products by Name A-Z or by price (low to high). After logging in, they can access the profile dropdown, add new products, and manage or edit their existing products.
- **Tools:** Next.js, React, Tailwind CSS, daisyUI, Firebase Authentication, Express.js, MongoDB, SweetAlert2, Vercel.

**DishDive** (November 2025- November 2025)

[Live](#) | [Client](#)

DishDive is a restaurant web application where users can explore dishes, read and submit reviews, and mark favorites. During development, I faced challenges with errors and deploying the backend server on Vercel, which I successfully resolved through research, problem-solving, and debugging.

- **User-Friendly Interface:** It features a clean UI, smooth navigation, and an organized layout, making it easy to browse and discover new dishes.
- **Filtering & Features:** Users can sort reviews by date or rating and switch between light and dark themes. Logged-in users can add, view, or edit their reviews via the profile dropdown.
- **Tools:** React.js, Node.js, Tailwind CSS, DaisyUI, Firebase, SweetAlert2, Express.js, MongoDB Atlas, Vercel.

**QuantumCode** (October 2025 - October 2025)

[Live](#) | [Client](#)

QuantumCode is an app available on multiple app stores, allowing users to easily access and use the apps they need. It can be uninstalled when no longer required. I overcame challenges with local storage and chart implementation through research and problem-solving.

- **User-Friendly Interface:** QuantumCode has a simple and clean design that's easy to navigate, so anyone can find and use apps without confusion.
- **Filtering & Features:** Users can search apps by name, see installed apps, install new ones, and manage them easily.
- **Tools:** Built with React, Tailwind CSS, DaisyUI, Recharts, SweetAlert2, and LocalStorage. Hosted on Netlify.

## Education & Certification

Bachelor of Science (B.Sc.)

2022-2025

European University of Bangladesh | CSE

[Certificate](#)

Complete Web Development With Programming Hero

2025

Programming Hero | Remote

[Certificate](#)

## Language

**Bangla** (Fluent) | **English** (conversational)
